NOTICE OF RETRACTION

Re: Phromnoi K, Reuter S, Sung B, Prasad S, Kannappan R, Yadav VR, Chanmahasathien W, Limtrakul P, and Aggarwal BB (2010) A novel pentamethoxyflavone down-regulates tumor cell survival and proliferative and angiogenic gene products through inhibition of IκB kinase activation and sensitizes tumor cells to apoptosis by cytokines and chemotherapeutic agents. *Mol Pharmacol* 79:279–289; doi:10.1124/mol.110.067512

Following an internal investigation, Figures 1 and 3 of the article referenced above have been found to contain unacceptable image manipulation. *Molecular Pharmacology* has retracted this article.
