### January 1997

For the article by Michelinaki *et al.* [Michelinaki, M., P. Mamos, C. Coutsogeorgopoulos, and D. L. Kalpaxis. Aminoacyl and peptidyl analogs of chloramphenicol as slow-binding inhibitors of ribosomal peptidyltransferase: a new approach for evaluating their potency. *Mol. Pharmacol.* **51**:139–146 (1997)], the authors have reported that the  $k_{\text{assoc}}$  values in the Summary and the legend for the vertical axis in Fig. 2 were incorrect. The correct  $k_{\text{assoc}}$  values are  $1.42 \times \mu\text{M}^{-1} \text{min}^{-1}$  for **2**,  $0.55 \times \mu\text{M}^{-1} \text{min}^{-1}$  for **3**,  $0.18 \times \mu\text{M}^{-1} \text{min}^{-1}$  for **4**, and  $0.038 \times \mu\text{M}^{-1} \text{min}^{-1}$  for **5**. The correct legend for Fig. 2 is **ln [100/(100 - x')]**.

We regret these errors and apologize for any confusion or inconvenience they may have caused.
