## NOTICES OF RETRACTION

- Re: Takada Y, Sethi G, Sung B, and Aggarwal BB (2008) Flavopiridol suppresses tumor necrosis factor-induced activation of activator protein-1, c-Jun N-terminal kinase, p38 mitogen-activated protein kinase (MAPK), p44/p42 MAPK, and Akt, inhibits expression of antiapoptotic gene products, and enhances apoptosis through cytochrome c release and caspase activation in human myeloid cells *Mol Pharmacol* May 2008 73:1549–1557; doi:10.1124/mol.107.041350 63
- Re: Phromnoi K, Reuter S, Sung B, Prasad S, Kannappan R, Yadav VR, Chanmahasathien W, Limtrakul P, and Aggarwal BB (2010) A novel pentamethoxyflavone down-regulates tumor cell survival and proliferative and angiogenic gene products through inhibition of I $\kappa$ B kinase activation and sensitizes tumor cells to apoptosis by cytokines and chemotherapeutic agents. *Mol Pharmacol* 79:279–289; doi:10.1124/mol.110.067512 64

## NOTICE OF CONCERN
