Allosteric Modulator KM822 Attenuates Behavioral Actions of Amphetamine in Caenorhabditis elegans through Interactions with the Dopamine Transporter DAT-1
Osama Refai, Shaili Aggarwal, Mary Hongying Cheng, Zayna Gichi, Joseph M. Salvino, Ivet Bahar, Randy D. Blakely, and Ole V. Mortensen

Cholesterol Inhibition of Slo1 Channels Is Calcium-Dependent and Can Be Mediated by Either High-Affinity Calcium-Sensing Site in the Slo1 Cytosolic Tail
Kelsey C. North, Man Zhang, Aditya K. Singh, Dasha Zaytseva, Alexandria V. Slayden, Anna N. Bukiya, and Alex M. Dopico

New Synthetic Caffeine Analogs as Modulators of the Cholinergic System
Camila Fabiani, Brunella Biscussi, Juan P. Munafò, Ana P. Murray, Jeremías Corradi, and Silvia S. Antollini

Senolytic-Mediated Elimination of Head and Neck Tumor Cells Induced Into Senescence by Cisplatin
Fereshteh Ahmadinejad, Tasia Bos, Bin Hu, Erin Britt, Jennifer Koblinski, Andrew J. Souers, Joel D. Leversohn, Anthony C. Faber, David A. Gewirtz, and Hisashi Harada

Supplemental material is available online at http://molpharm.aspetjournals.org.

About the cover: KM822 binds to C. elegans DAT-1 at an allosteric site that closely overlaps with the KM822-binding site onto hDAT. See the article by Refai et al. (dx.doi.org/10.1124/molpharm.121.000400).
