CONTENTS

STEPHEN M. LANIER, HANS-JURGEN HESS, ALEX GRODSKI, ROBERT M. GRAHAM, AND CHARLES J. HOMCY. Synthesis and Characterization of a High Affinity Radioiodinated Probe for the \( \alpha_2 \)-Adrenergic Receptor ........................................... 219

MARTIN J. LOHSE, KARL-NORBERT KLOTZ, AND ULRICH SCHWABE. Effect of Temperature and Membrane Phase Transitions on Ligand Binding to \( \alpha_2 \)-Receptors of Human Platelets ........................................... 228

SEYMOUR MONG, HSIAO-LING WU, JEFFREY M. STADEL, MIKE A. CLARK, AND STANLEY T. CROOKE. Solubilization of \(^{3}H\)Leukotriene D\(_1\) Receptor Complex from Guinea Pig Lung Membranes ........................................... 235

TOMIKO ASANO AND NOBUAKI OGASAWARA. Uncoupling of Aminobutyric Acid B Receptors from GTP-Binding Proteins by \( N \)-Ethylmaleimide: Effect of \( N \)-Ethylmalimeimide on Purified GTP-Binding Proteins ........................................... 244

K. L. SWANSON, C. N. ALLEN, R. S. ARONSTAM, H. RAPPOPORT, AND E. X. ALBUQUERQUE. Molecular Mechanisms of the Potent and Stereospecific Nicotinic Receptor Agonist (+)-Anatoxin-a ........................................... 250

YASUHIRO WATANABE AND KARL H. JAKOBS. Inhibition of \( N_2 \)-Stimulated Human Platelet Adenylate Cyclase by Forskolin ........................................... 258

TOSHIRO TANAKA, HAYATO UMEKAWA, MASAIRO SAITO, TOMOHIKO ISHIKAWA, TOMOYASU SHIN, MASA AKI ITO, HIROO ITOH, YUTAKA KAWAMATSU, HIROSADA SUGIHARA, AND HIROYOSHI HIDAKA. Modulation of Calmodulin Function and of Ca\(^{2+}\)-Induced Smooth Muscle Contraction by the Calmodulin Antagonist, HT-74 ........................................... 264

JANE F. GRIFFIN, DOUGLAS C. ROHRER, KHALIL AHMED, ARTHUR H. L. FROM, T. HASHIMOTO, H. RATHORE, AND DWIGHT S. FULLERTON. The Effect of 16\( \beta \)-Substitution on the Structure and Activity of Digitoxigenin: Is There an Additional Binding Interaction with Na\(^{+}\),K\(^{+}\)-ATPase? ........................................... 270

BRUNO GASNIER, MARIE-PAULE ROISIN, DANIEL SCHERMAN, SABINE CORNAERT, GÉRARD DESPLANCHES, AND JEAN-PIERRE HENRY. Uptake of \( \text{meta-Lodo} \)-benzylguanidine by Bovine Chromaffin Granule Membranes ........................................... 275

BRUNO GIROS, CLAUDE GROS, BRIGITTE SOLHONNE, AND JEAN-CHARLES SCHWARTZ. Characterization of Aminopeptidases Responsible for Inactivating Endogenous (Met\(^{3}\))Enkephalin in Brain Slices Using Peptidase Inhibitors and Anti-aminopeptidase M Antibodies ........................................... 281

M. V. WILLIAMS. Effects of Mercury (II) Compounds on the Activity of dUTPases from Various Sources ........................................... 288

B. CYBULSKA, M. HERVE, E. BOROWSKI, AND C. M. GARY-BOBO. Effect of the Polar Head Structure of Polyene Macrolide Antifungal Antibiotics on the Mode of Ergosterol- and Cholesterol-Containing Lipidic Vesicles Studied by \(^{31}P\)-NMR ........................................... 293

PAUL M. SWEETNAM AND JOHN F. TALLMAN. Regional Difference in Brain Benzodiazepine Receptor Carbohydrates ........................................... 299

ALLYN C. HOWLETT, JAMES M. QUALY, AND LEILIL L. KHACHATRIAN. Involvement of G\(_i\) in the Inhibition of Adenylate Cyclase by Cannabinimetic Drugs ........................................... 307

BERNARD MAIGRET, MARIE-CLAUDE FOURNIER-ZALUSKI, BERNARD ROQUES, AND S. PREMILAT. Proposals for the \( \mu \)-Active Conformation of the Enkephalin Analog Tyr-cyclol(-N\(_2\)-A\(_2\)-bu-Gly-Phe-Leu-) ........................................... 314
