CONTENTS

ACCELERATED COMMUNICATION

IAN J. REYNOLDS AND RICHARD J. MILLER. Multiple Sites for the Regulation of the N-Methyl-D-Aspartate Receptor .......................... 581

ARTICLES

YUKIKO YAJIMA, YOSHIKO AKITA, AND TOSHIKAZU SAITO. Effects of Cholera Toxin on the Coupling of Thyrotropin-Releasing Hormone to a Guanine Nucleotide-Binding Protein in Cultured GH3 Cells ..................................................................................... 592

TOMOHKO ISHIKAWA, TAKASHI CHUJIWA, MASATOSHI HIGIWARA, SHIGEO MAMIYA, MASHIRO SAITOH, AND HIROYOSHI HIDAKA. ML-9 Inhibits the Vascular Contraction via the Inhibition of Myosin Light Chain Phosphorylation ........................................ 598

SEIJI NAKAMURA, KAZUHIRO OHMI, AND YOSHIKI NONOMURA. Low Concentration of Resperine Accelerates Actin Polymerization via Interaction with G-Actin .............................................................................................................. 604

JEFFREY ROSENBERG AND PAUL SATO. Messenger RNA Loses the Ability to Direct In Vitro Peptide Synthesis following Incubation with Cisplatin ................................................................................................................ 611

ETTORE GIRALDO, MARIA ALESSANDRA VIGANO, RUDOLF HAMMER, AND HERBERT LADINSKY. Characterization of Muscarinic Receptors in Guinea Pig Ileum Longitudinal Smooth Muscle .......................................................................................... 617

JILL DONALDSON, STEPHEN J. HILL, AND ANTHONY M. BROWN. Kinetic Studies on the Mechanism by which Histamine H1 Receptors Potentiate Cyclic AMP Accumulation in Guinea Pig Cerebral Cortical Slices ................................................................................................................. 626

MICHAEL BLANTON, ELIZABETH MCCARDY, TIM GALLAHER, AND HOWARD H. WANG. Noncompetitive Inhibitors Reach Their Binding Site in the Acetylcholine Receptor by Two Different Paths ........................................................................... 634

JAIN F. JAMES, CHRISTOPHER S. J. WALPOLE, JOSIPHINE HIXON, JOHN N. WOOD, AND ROGER WRIGHTSWORTH. Long-Lasting Agonist Activity Produced by a Capsaicin-like Photoaffinity Probe ................................................................................. 643

ROGER D. Nolan, ROBERTA M. DANILOWICZ, AND THOMAS E. ELING. Role of Arachidonic Acid Metabolism in the Mitogenic Response of BALB/c 3T3 Fibroblasts to Epidermal Growth Factor ............................................................................................................. 650

CYNTHIA HUMPHREYS, JENNIFER LEVIN, AND GARY RUDNICK. Antidepressant Binding to the Porcine and Human Platelet Serotonin Transporters ...................................................................................................................... 657

MARK A. SIMMONS AND H. CRIST HARTZELL. Role of Phosphodiesterase in Regulation of Calcium Current in Isolated Cardiac Myocytes .................................................................................................................. 664

FRANCOIS DARCHEN, DANIEL SCHERMAN, PIERRE M. LADURON, AND JEAN-PIERRE HENRY. Ketanserin Binds to the Monoamine Transporter of Chromaffin Granules and of Synaptic Vesicles ................................................................................... 672

FERENC OFROS, TANIA Y. CHRISTOVA, AND JUDIT OVADI. Functional In Vitro Test of Calmodulin Antagonism: Effect of Drugs on Interaction between Calmodulin and Glycolytic Enzymes ............................................................... 678

JAMES D. MOYER, OFER REIZES, SURENDER AHIR, CONG JIANG, NANCY MALINOWSKI, AND DAVID C. BAKER. Substrate Properties of Analogs of myo-Inositol .............................................................................................................. 683
