### Announcement

## GRANT PROGRAM

Molecular Devices Corporation offers a limited number of equipment grants to U.S. and International academic institutions performing research in the fields of pharmacology and/or physiology. The intent of this grant program is to provide academic researchers access to the Cytosensor<sup>R</sup> Microphysiometer technology at a substantially reduced cost, thereby enabling researchers the opportunity to make novel discoveries using the Cytosensor System, with the ultimate goal of publication.

Briefly, the Cytosensor System is the latest tool for studying the physiological consequences of receptor activation; it has been shown to be particularly useful for drug discovery and signal transduction research. The System can monitor receptor-mediated responses from living cells in minutes, providing functional dose responses in just a few hours. Receptor activation can be studied even without previous knowledge of the signal transduction pathway.

For a comprehensive information package including guidelines for grant submittal, scientific publications, Application Notes, Technical Bulletins and a Reference Guide please contact:

Is your special interest receptors and neurotransmitters...drug metabolism...antibiotic and anticancer drug actions...or other areas related to molecular basis of drug action? If so, you should be subscribing to **MOLECULAR PHARMACOLOGY**.

The editor's and editorial board's high standards ensure that the papers you read in **MOLECULAR PHARMACOLOGY** are on the cutting edge of research on drug action and selective toxicity at the molecular level. Original applications of biochemistry, biophysics, genetics, and molecular biology are juxtaposed with innovative pharmacologic research to elucidate basic problems in pharmacology and toxicology, including such areas as molecular mechanisms involved in drug receptor-effector coupling, xenobiotic metabolism, and antibiotic and anti-cancer drug action. Start your subscription today to ensure access to the most newsworthy papers in your field. *Monthly*

Cut out and send in the coupon or call toll-free to start your subscription immediately, **1-800-638-6423** from anywhere in the U.S. or Canada.
