Williams & Wilkins Quick Copies. Tell us today. Read it tomorrow.

You can get copies of any article published in any Williams & Wilkins journal. It's fast – because we're the primary source, we can fax an article to you within **24 hours** of when we receive your request. It costs less – there are **no copyright fees** and the **cost of faxing is included in the price**. It's affordable – look at the table to the right.

RATES, PER ARTICLE

1–5 pages	\$12
6–10 pages	\$15
11–15 pages	\$18
16–20 pages	\$21
21–25 pages	\$24
26+ pages	\$30

Additional charges
for overnight delivery

CYTOSENSOR[®]
MICROPHYSIOMETER

The Only Comprehensive Assay System for Receptor Signaling.

.....
**THE CYTOSENSOR SYSTEM:
FUNCTIONAL RESPONSES IN MINUTES**

The **Cytosensor Microphysiometer System** is the latest tool used for drug discovery and signal transduction research! Using a patented biosensor, the system can monitor the receptor-mediated responses from living cells in minutes, producing functional dose responses in just a few hours. Because of the unique biosensor, receptor activation can be studied even without previous knowledge of the signal transduction pathway. Thus, a single assay system can be used to evaluate a variety of receptor families. Previously time-consuming experiments can be performed quickly and easily, making it possible to obtain EC_{50} and IC_{50} values in just 4-7 hours²; without radioactivity. And novel receptor responses, not seen with other methods, have been observed.
