ARTICLES

Pharmacological Chaperoning of Nicotinic Acetylcholine Receptors Reduces the Endoplasmic Reticulum Stress Response
Rahul Srinivasan, Christopher I. Richards, Cheng Xiao, Doreen Rhee, Rigo Pantoja, Dennis A. Dougherty, Julie M. Miwa, and Henry A. Lester

Nonequilibrium Activation of a G-Protein-Coupled Receptor
Manuela Ambrosio and Martin J. Lohse

DNA Polymerase ζ Is a Major Determinant of Resistance to Platinum-Based Chemotherapeutic Agents
Shilpy Sharma, Nicholas A. Shah, Ariell M. Joiner, Katelyn H. Roberts, and Christine E. Canman

Mode of Peroxisome Proliferator-Activated Receptor γ Activation by Luteolin

Differential Expression and Function of Alternative Splicing Variants of Human Liver X Receptor α
Kaori Endo-Umeda, Shigeyuki Uno, Ko Fujimori, Yoshikazu Naito, Koichi Saito, Kenji Yamagishi, Yangsik Jeong, Hiroyuki Miyachi, Hiroaki Tokiwa, Sachiko Yamada, and Makoto Makishima

Small-Molecule Targeting of Proliferating Cell Nuclear Antigen Chromatin Association Inhibits Tumor Cell Growth

Receptor Conformations Involved in Dopamine D2L Receptor Functional Selectivity Induced by Selected Transmembrane-5 Serine Mutations
J. Corey Fowler, Supriyo Bhattacharya, Jonathan D. Urban, Nagarajan Vaidehi, and Richard B. Mailman

Identification and Characterization of a Novel Class of c-Jun N-terminal Kinase Inhibitors
Igor A. Schepetkin, Liliya N. Kirpotina, Andrei I. Khlebnikov, Tracey S. Hanks, Irina Kochetkova, David W. Pascual, Mark A. Jutila, and Mark T. Quinn

Thermodynamics and Docking of Agonists to the β2-Adrenoreceptor Determined Using [3H](R,R′)-4-Methoxyfenoterol as the Marker Ligand
Lawrence Toll, Karolina Pajak, Anita Plazinska, Krzysztof Jozwiak, Lucita Jimenez, Joseph A. Kozocas, Mary J. Tanga, James E. Bupp, and Irving W. Wainer
ERRATA
Correction to “Hydrogen Sulfide Inhibits Rotenone-Induced Apoptosis via Preservation of Mitochondrial Function” 855

Correction to “Fisetin, an Inhibitor of Cyclin-Dependent Kinase 6, Down-Regulates Nuclear Factor-κB-Regulated Cell Proliferation, Antiapoptotic and Metastatic Gene Products through the Suppression of TAK-1 and Receptor-Interacting Protein-Regulated IκBα Kinase Activation” 856

Supplemental material is available online at http://molpharm.aspetjournals.org.

About the cover: Stabilization of multiple receptor conformations (agonist states 1 and 2) by the D3 agonists. See article by Fowler et al. on page 820 of this issue.
