SUBJECT INDEX

A

N-Acetoxy-2-fluorenylaceta-
 mide on DNA tem-
 plate activity, 658
 Acetylaminofluorene *N*-hydroxylation, 398
 Acetylcholine, nuclear magnetic resonance, 144
 Acetylcholine on sulfated mucopolysaccharide
 release from adrenal, 590
 Acetylcholine-phenylcyclidine interaction, 820
 Acetylcholine receptor binding in brain fractions,
 33
 Acetylcholine synthesis, inhibition by hemicholi-
 nium-3, 630
 Acetylcholinesterase, acceleration of methane-
 sulfonation, 561
 Acylation of *L*-asparaginase, 534
 Adenosine 3',5'-monophosphate: See *cyclic nu-
 cleotides*.
 Adenosine on brain adenylate cyclase, 774
 Adenosine on cyclic AMP in fat cells, 595
 Adenosine triphosphatase ($\text{Na}^+ + \text{K}^+$), associ-
 ation with cardiac glycosides, 766
 Adenosine triphosphatase ($\text{Na}^+ + \text{K}^+$), cardiac
 glycoside dissociation, 51
 Adenosine triphosphatase ($\text{Na}^+ + \text{K}^+$), *L*-methio-
 nine *S*-adenosyltransferase inhibition, 542
 Adenosine triphosphatase ($\text{Na}^+ + \text{K}^+$), ouabain
 binding, 278
 Adenosine triphosphatase ($\text{Na}^+ + \text{K}^+$), strophan-
 thidin bromoacetate binding, 676
 Adenosine triphosphate analogues on ($\text{Na}^+ +$
 K^+)-ATPase, 278
S-Adenosylmethionine binding to phenethanol-
 amine *N*-methyltransferase, 718
S-Adenosylmethionine synthesis and levels, 542
 Adenylate cyclase response during brain ontogeny,
 774
 Adrenal medulla amine stores, 105
 Adrenal medulla, dopamine β -hydroxylase, 172
 Adrenal medulla, phenylethanolamine *N*-methyl-
 transferase, 117, 718
 Adrenal medulla, sulfated mucopolysaccharides,
 590
 Adrenal medulla vesicles, 748
 Adrenergic blocking agents, inhibition of dehy-
 drogenases, 191
 Adrenergic nerve degeneration and cyclic AMP,
 619
 Adrenergic nerve enzyme release, 178
 Adrenergic receptors in brain development, 774
 Adrenergic receptors in brain, effect of 6-hydroxy-
 dopamine, 711

Adrenergic receptors in pineal, 184, 605, 612
 Alcohol dehydrogenase inhibition by propranolol,
 191
 Alcohol dehydrogenase, vitamin A binding, 199
 Alcohol effect on cytochrome P-450, 670
 Alcohol inhibition of *p*-hydroxylation, 383
 Aldehyde dehydrogenase inhibition by pro-
 pranolol, 191
 Aldehyde reductase from brain, 428
 Allosteric model of receptors, 1
 Amino acid antagonists on tRNA binding to
 ribosomes, 229
 Amino acid dehydrogenases and transaminases,
 effect of tranquilizers, 726
 α -Amino alcohols on tRNA binding to ribosomes,
 229
 γ -Aminobutyric acid on membrane conductance
 in locust muscle, 571, 580
 δ -Aminolevulinic acid synthetase induction, 736
 Anesthetic binding to myoglobin, 835
 Anesthetics, local on mitochondrial membranes,
 360
 Anesthetics, molecular orbital calculations, 152
 Anesthetics, pressure reversal, 131
 Aniline *p*-hydroxylation, inhibition by alcohols,
 383
 1-Anilino-8-naphthalenesulfonate probe in drug-
 protein binding, 649
 Antibodies, incorporation of LSD, 421
 Antibodies to tyrosine hydroxylase, 438
 Antimalarials on *Tetrahymena pyriformis*, 304
 Aryl hydrocarbon hydroxylase induction, 266,
 692, 736
 Aryl hydrocarbon hydroxylase, induction and
 cyclic GMP, 686
L-Asparaginase modification, half life, 534
 Atropine binding to acetylcholine receptor, 33
 Axoplasmic transport inhibition, 41

B

Benzo[a]pyrene and aryl hydrocarbon hydroxyl-
 ase, 266
 5-Bromodeoxycytidine on DNA synthesis, 698
 5-Bromodeoxycytidine phosphorylation, 704

C

Calcium on ($\text{Na}^+ + \text{K}^+$)-ATPase, 336
 Carbonic anhydrase, spin label, 61
 Carbon monoxide binding to cytochromes, 219
 Carcinogen, carcinogenesis: See *tumors*.

- Cardiac glycoside alkylation of ($\text{Na}^+ + \text{K}^+$)-ATPase, 676
- Cardiac glycoside association constants with ($\text{Na}^+ + \text{K}^+$)-ATPase, 766
- Cardiac glycoside binding to ($\text{Na}^+ + \text{K}^+$)-ATPase, 278, 336, 350
- Cardiac glycosides, dissociation from ($\text{Na}^+ + \text{K}^+$)-ATPase, 51
- Catecholamine aldehyde reductase in brain, 428
- Catecholamine and dopamine β -hydroxylase release, 178
- Catecholamine binding to phenethanolamine *N*-methyltransferase, 718
- Catecholamine effects on brain adenylate cyclase, 774
- Catecholamine receptors in pineal gland, 184
- Catecholamine recovery after insulin, 105
- Catecholamine responses in brain after 6-hydroxydopamine, 711
- Catecholamines, molecular orbital calculations, 486
- Catecholamines, nuclear magnetic resonance, 756
- Catecholamines on brain cyclic AMP, 619
- Catecholamines on fat cell cyclic AMP, 595
- Catecholamines on phosphofructokinase in heart, 405
- Catecholamines on pineal *N*-acetyl-5-hydroxytryptamine, 605
- Catecholamines on pineal enzymes, 612
- Catecholamine storage and release in adrenal medulla, 590
- Catecholamine storage in vesicles, 748
- Catecholamine uptake, effect of 6-hydroxydopamine isomers, 505
- Cations and cationic drugs on membrane perturbation, 802
- Chiral alkaloids, circular dichroic conformation, 10
- Chlorinated dibenzo-*p*-dioxins, enzyme induction, 736
- Chlorinated ethane anesthetics, molecular orbital calculations, 152
- 6-Chloro-8-aza-9-cyclopentylpurine inhibition of RNA polymerase, 81
- Choline uptake inhibition by hemicholinium-3, 630
- Cholinergic drugs, nuclear magnetic resonance, 144
- Cholinergic effectors on eel acetylcholinesterase, 561
- Cholinergic ligand binding to brain fractions, 33
- Cholinergic mechanisms in synaptosomes, 630
- Cholinergic receptors, electrostatic potential patterns of inhibitors, 820
- Chromosomal proteins, amino acid incorporation, 247
- Circular dichroism of nicotine, 10
- Complexation of iron(III) and desferrioxamine B, 514
- Conformational: See *crystal structure, fluorescent probe, molecular orbital calculations, nuclear magnetic resonance, etc.*
- Critical volume hypothesis of anesthetics, 131
- Crystal structure of hallucinogens, 23
- Cyclic nucleotides and aryl hydrocarbon hydroxylase induction, 686
- Cyclic nucleotides and catecholamine release, 178
- Cyclic nucleotides during brain ontogeny, 774
- Cyclic nucleotides in brain, 619
- Cyclic nucleotides in brain after 6-hydroxydopamine, 711
- Cyclic nucleotides in CNS, effects of depolarizing agents, 445
- Cyclic nucleotides in fat cells, inhibition by purines, 595
- Cyclic nucleotides, pineal, 184, 612
- Cytochrome *b₅* in microsomal oxidation, 840
- Cytochrome P-420, CO binding, 219
- Cytochrome P-420, 3-methylcholanthrene treatment, 372
- Cytochrome P-450, CO binding, 219
- Cytochrome P-450, drug binding correlated with NADH and NADPH, 470
- Cytochrome P-450, effect of alcohol, 670
- Cytochrome P-450 in *N*-hydroxylation, 398
- Cytochrome P-450 in reconstitution of microsomal oxidase, 93
- Cytochrome P-450, mercury inhibition, 237
- Cytochrome P-450, 3-methylcholanthrene treatment, 372

D

- N*-Demethylation dependence on NADH, NADPH, 455
- Deoxycytidine kinase, effect on halogenated deoxycytidine analogues, 704
- Deoxyribonucleic acid, simulation of drug effects on, 320
- Deoxyribonucleic acid polymerases, effect of antimalarials, 304
- Deoxyribonucleic acid polymerases, inhibition by fluorinated pyrimidines, 783
- Deoxyribonucleic acid pyrimidines, effect of 5-fluorodeoxyuridine, 297
- Deoxyribonucleic acid synthesis from deoxynucleosides, 698
- Deoxyribonucleic acid template activity, effect of carcinogen, 658
- Desferrioxamine B, kinetics of iron(III) complexation, 514
- Dichlorodiphenyltrichloroethanes, nuclear magnetic resonance, 17
- Dichloromethane binding to myoglobin, 835
- Disulfides, effect on insulin release, 792
- Dithiobisnitrobenzoic acid inhibition of glyceraldehyde 3-phosphate dehydrogenase, 209

Dopamine β -hydroxylase inhibition by fusaric acid, 172
 Dopamine β -hydroxylase release, 178

E

Electron spin resonance, sulfonamides and carbonic anhydrase, 61
 Epinephrine: See *catecholamines*.
 Epoxide hydrazide induction, 692
 Estrogens, distribution and activity, 520
 Ethacrynic acid inhibition of glyceraldehyde 3-phosphate dehydrogenase, 209

F

Fatty acyl coenzyme A inhibition of microsomal oxidation, 455
 Fluorescent probe of drug binding to serum albumin, 649
 Fluorescent probe of *p*-hydroxylation, 383
 Fluorescent probe of tetrodotoxin, 330
 Fluorinated pyrimidines and DNA polymerases, 783
 Fluorinated pyrimidines on RNA transcription, 283
 5-Fluorodeoxycytidine on DNA synthesis, 698
 5-Fluorodeoxycytidine phosphorylation, 704
 5-Fluorodeoxyuridine on DNA pyrimidines, 297

G

Genetic expression of inducible microsomal enzymes, 692
 Genetics of enzyme induction and tumorigenesis 266
 Glutamate dehydrogenase-glutamate-oxalacetate transaminase complex, 726
 Glyceraldehyde 3-phosphate dehydrogenase inhibition by ethacrynic acid, 209
 Guanosine 3',5'-monophosphate in CNS, 445

H

Hallucinogens, molecular orbital calculations, 640
 Harmine on catecholamine storage and metabolism, 748
 Heme proteins and methyl mercury, 237
 Heme proteins, cytochrome *b*, 840
 Heme proteins, dependence on NADH and NADPH, 470
 Heme proteins in 3-methylcholanthrene treated rats, 372
 Heme proteins in reconstitution of microsomal oxidase, 93
 Heme proteins, NADH, NADPH dependence, 455
 Heme transfer and CO binding, 219
 6-Hydroxydopamine isomers on norepinephrine uptake, 505
 6-Hydroxydopamine, molecular orbital studies of congeners, 495

6-Hydroxydopamine on brain adrenergic receptors, 711
 6-Hydroxydopamine on cyclic AMP in brain slices, 619
N-Hydroxylation, involvement of cytochrome P-450, 398
 5-Hydroxytryptamine *N*-acetyltransferase, 184, 605, 612
 5-Hydroxytryptamine aldehyde reductase in brain, 428
 5-Hydroxytryptamine uptake by *Schistosoma mansoni*, 311

I

Insecticides, nuclear magnetic resonance, 17
 Insulin on adrenal catecholamines, 105
 Insulin on fat cell cyclic AMP, 595
 Insulin release, role of thiol groups, 792
 5-Iododeoxycytidine phosphorylation, 704
 Iron(III) complexation with desferrioxamine B, 514
 Isoproterenol on phosphofructokinase in heart, 405
 Isoproterenol: See also *catecholamines*.

L

Leukemic cells, simulation of drug effects on DNA synthesis, 320
 Levallorphan on cell division, 163
Locusta migratoria muscle, effect of γ -aminobutyric acid, 571, 580
 Lymphoid cells, LSD incorporation into antibodies, 421
 Lysergic acid diethylamide, incorporation into antibody protein, 421
 Lysergic acid diethylamide, molecular orbital calculations, 640
 Lysergic acid diethylamide, X-ray diffraction, 23

M

Mercury inhibition of microsomal oxidase, 237
 Mescaline, inhibition of axoplasmic transport, 41
 Methanesulfonation of acetylcholinesterase, 561
 3-Methylcholanthrene induction of inducible microsomal enzymes, 692
 3-Methylcholanthrene on chromosomal proteins, 247
 3-Methylcholanthrene on cytochrome P-420, 372
 Methyl mercury and microsomal oxidases, 237
 Microsomal enzyme induction and cyclic GMP, 686
 Microsomal enzyme induction by chlorinated dibenzo-*p*-dioxins, 736
 Microsomal enzyme induction by ethanol, 670
 Microsomal heme proteins, 3-methylcholanthrene effect, 372
 Microsomal *N*-hydroxylation, 398

Microsomal *p*-hydroxylation, hydrophobic site of inhibition, 383
 Microsomal oxidases, CO binding, 219
 Microsomal oxidases, mercury inhibition, 237
 Microsomal oxidases, reconstitution, 93
 Microsomal oxidation, dependence on NADH and NADPH, 455, 470
 Microsomal oxidation, role of cytochrome *b₅*, 840
 Mitochondrial membranes, effect of local anesthetics, 360
 Molecular orbital calculations for catecholamines, 756
 Molecular orbital calculations of chlorinated anesthetics, 152
 Molecular orbital calculations on psilocin and mescaline, 640
 Molecular orbital studies of 6-hydroxydopamine congeners, 495
 Molecular orbital study of phenethylamines, 486
 Myoglobin, anesthetic binding, 835

N

Neoplasia, neoplasms: See *tumors*.
 Neurophysin II binding of vasopressin analogues, 414
 Nicotinamide nucleotides: See *pyridine nucleotides*.
 Nicotine, circular dichroic conformation, 10
 Nicotine, nuclear magnetic resonance, 144
 Norepinephrine, molecular orbital calculations, 486
 Norepinephrine uptake, effect of 6-hydroxydopamine isomers, 505
 Norepinephrine: See also *catecholamines*.
 Nuclear magnetic resonance of catecholamines, 756
 Nuclear magnetic resonance of dichlorodiphenyltrichloroethane, 17
 Nuclear magnetic resonance of nicotine and acetylcholine, 144
 Nucleoside incorporation into DNA, 698

O

Orotic acid, inhibition of incorporation into RNA by phenobarbital, 259

P

Peptide hormone binding, 414
 Phencyclidine, quantum mechanical analysis, 820
 Phenobarbital induction of inducible microsomal enzymes, 692
 Phenobarbital on chromosomal proteins, 247
 Phenobarbital on pyrimidine incorporation into RNA, 259
 Phenethanolamine *N*-methyltransferase, substrate binding, 718

Phenylalkylamines, molecular orbital calculations, 640
 Phenylethanolamine *N*-methyltransferase, multiple forms, 117
 Phosphatidyl choline in reconstituted microsomal oxidase, 93
 Phosphofructokinase activity effect of substrates and isoproterenol, 405
 Phospholipids in erythrocyte membranes, 802
 Phospholipids on ouabain binding to (Na⁺ + K⁺)-ATPase, 350
 Picolinic acid analogues inhibition of dopamine β -hydroxylase, 172
 Pineal *beta* adrenergic receptors, 184
 Pineal *N*-acetyl-5-hydroxytryptamine, 605
 Pineal 5-hydroxytryptamine *N*-acetyltransferase and adenylate cyclase, 612
Plasmodium berghei on thymidylate synthetase in erythrocytes, 74
 Propranolol inhibition of dehydrogenases, 191
 Protein binding of radioopaque contrast agents, 649
 Proteins in erythrocyte membranes, 802
 Psilocin, molecular orbital calculations, 640
 Psilocybin, X-ray diffraction, 23
 Pterin-dependent hydroxylases, antibodies, 438
 Purine nucleoside analogue inhibition of RNA polymerase, 81
 Purines on cyclic AMP in fat cells, 595
 Pyridine nucleotide dependent peroxidase, 670
 Pyridine nucleotides and cytochrome *b₅*, 840
 Pyridine nucleotides in microsomal oxidation, 455, 470
 Pyridine nucleotides on reconstituted microsomal oxidase, 93
 Pyrimidines, synthesis and 5-fluorodeoxyuridine, 297

R

Radioopaque contrast agents binding to serum albumin, 649
 Receptors, allosteric model, 1
 Receptors, *beta* adrenergic in pineal gland, 184
 Receptors, uterine for estradiol derivatives, 520
 t-Ribonucleic acid binding to ribosomes, effect of α -amino alcohols, 229
 Ribonucleic acid polymerase, effect of antimalarials, 304
 Ribonucleic acid polymerase, effect of carcinogen, 658
 Ribonucleic acid polymerase inhibition by purine nucleoside, 81
 Ribonucleic acid transcription, effect of fluorinated pyrimidines, 283
 Ribosomal RNA, effect of phenobarbital, 259

S

- Schistosome uptake of 5-hydroxytryptamine, 311
Serotonin: See *5-Hydroxytryptamine*.
Sodium dependent ANS fluorescence, effect of tetrodotoxin, 330
Sodium-potassium ATPase, association constants of cardiac glycosides, 766
Sodium-potassium ATPase, cardiac glycoside dissociation, 51
Sodium-potassium ATPase, effect of calcium ion, 336
Sodium-potassium ATPase, ouabain binding, 278
Sodium-potassium ATPase, phospholipids and ouabain binding, 350
Sodium-potassium ATPase, strophanthidin bromoacetate binding, 676
Sulfated mucopolysaccharides in adrenal medulla, 590
Sulfonamides, spin labelled and carbonic anhydrase, 61
Synaptosomes, acetylcholine synthesis, 630

T

- Tetrahydrofolate analogues, 74
Tetrahymena pyriformis, effect of levallorphan, 163
Tetrahymena pyriformis, RNA and DNA polymerases, 304
Tetrodotoxin on ANS fluorescence of membranes, 330
Thiol effects on insulin release, 792

- Thymidylate synthetase, erythrocyte, 74
Tranquilizers on enzyme association, 726
Trimethoxyamphetamine, X-ray diffraction, 23
Trimethoxyphenylalkylamines, inhibition of axoplasmic transport, 41
Trinitrobenzenesulfonate interaction with drugs on membranes, 802
Tumors, *S*-adenosylmethionine synthesis, 542
Tumors, effect of 5-fluorodeoxyuridine, 297
Tumor cells, simulation of drug-DNA interaction, 320
Tumor inhibition by cross-linked L-asparaginase, 534
Tumorigenesis and genetic differences in aryl hydrocarbon hydroxylase, 266
Tumorigenic agents on DNA template activity, 658
Tyrosine hydroxylase, antibodies, 438

V

- Vaccinia transcription, effect of fluorinated pyrimidines, 283
Vaccinia virus DNA polymerase, effect of fluorinated pyrimidines, 783
Vasopressin analogue binding to neurophysin II, 414
Vitamin A binding to alcohol dehydrogenase, 199

X

- X-ray diffraction of hallucinogens, 23
X-ray diffraction of myoglobin, 835
