Number 2

molpharm.aspetjournals.org

ISSN 1521-0111

SPECIAL SECTION ON NEW OPPORTUNITIES IN TARGETING WNT SIGNALING—MINIREVIEW

Molecular Pharmacology of Class F Receptor Activation

Pawel Kozielowicz, Ainoleena Turku, and Gunnar Schulte

62

Wnt Signaling and Drug Resistance in Cancer

Zheng Zhong, and David M. Virshup

72

Interventions in WNT Signaling to Induce Cardiomyocyte Proliferation: Crosstalk with Other
Pathways

W. Matthijs Blanckesteijn

90

ARTICLES

Characterization and Optimization of the Novel Transient Receptor Potential Melastatin 2
Antagonist tatM2NX

I. Cruz-Torres, D.S. Backos, and P.S. Herson

102

Alternative Polyadenylation of ABC Transporters of the C-Family (ABCC1, ABCC2, ABCC3) and
Implications on Posttranscriptional Micro-RNA Regulation

*Oliver Bruhn, Marie Lindsay, Friederike Wiebel, Meike Kaehler, Inga Nagel, Ruwen Böhm,
Christian Röder, and Ingolf Cascorbi*

112

Anaplastic Lymphoma Kinase Regulates Internalization of the Dopamine D2 Receptor

Donghong He, and Amy W. Lasek

123

The I_{Ks} Ion Channel Activator Mefenamic Acid Requires KCNE1 and Modulates Channel Gating in
a Subunit-Dependent Manner

Yundi Wang, Jodene Eldstrom, and David Fedida

132

NOTICE OF RETRACTION

Notice of Retraction: Tripathy S, Chapman JD, Han CY, Hogarth CA, Arnold SLM, Onken J, Kent T,
Goodlett DR, and Isoherranen N (2016) *All-trans-retinoic acid enhances mitochondrial function
in models of human liver. Mol Pharmacol* 89(5):560–574; doi:10.1124/mol.116.103697

61

Supplemental material is available online at <http://molpharm.aspetjournals.org>.

About the cover: Molecular modeling of tatM2NX with the human TRPM2 channel NUDT9-H domain. See article by Cruz-Torres et al. (dx.doi.org/10.1124/mol.119.117549).
