Supplementary Figure S2: Both selective inhibitors STO-609 and KN-93 reduce LC3 lipidation. According to Fig. 4C, additional experiments are shown here (A, B). Each of the 3 independent experiments (Fig. 4C, Suppl. Fig. S2A, Suppl. Fig. S2B) provides evidence that STO-609/KN-93 treatment prominently reduced nutrient-starvation induced LC3-lipidation.
